EDUCATION

B.S. Civil Engineering – Bucknell University   2019 - 2023

SKILLS

- Python (Pandas, NumPy, MatPlotLib)
- R
- SQL (MySQL, SQL Server)
- Tableau
- GitHub
- Excel
- MATLAB
- Data Cleaning and Preprocessing
- BigQuery
- MicroStation (OpenRoads) & SS10
- AutoCAD
- Bluebeam Revu

PROJECTS https://jonathans555.github.io/

CONCRETE CURING and the EFFECTS OF VIBRATION   Jan 2022

- Conducted in-depth statistical analysis on the effects of shock vibrations on curing concrete using **R Studio**.
- Created data visualizations (scatterplots, Q-Q plots, boxplots) and conducted residual analysis.
- Identified a linear relationship between shock vibrations and decreased structural integrity, providing critical insights for civil engineering.
- Developed and validated a linear regression model relating peak particle velocity (PPV) to ultrasonic pulse velocity ratio.
- Conducted hypothesis tests and calculated confidence intervals to compare cracked vs. non-cracked concrete.

CUSTOMER SALES ANALYSIS   Feb 2023

- Utilized **SQL** to extract analyze data from SOMETHING FROM that python for business analystics class using **MatPlotLib**

The covid 19 data project from statistics class

EXPERIENCE

ROADWAY ENGINEER - Element Engineering Group   Summer 2023 - Present

- Utilize **MicroStation (OpenRoads)** to prepare roadway plans, typical sections, quantities, TTCP, and submittals following QC/QA process.
- Reference **FDOT design standards** and Basis of Estimates (BOE) to prepare plans

STRUCTURAL ENGINEER - General Dynamics, Electric Boat   Summer 2022

- Write instructions for the sub-contractors to perform repairs and updates to the U.S. Navy's **nuclear submarines**. Specifically repairs to pressure hull and non-pressure hull structural systems (i.e. torpedo tubes, ballast tanks, etc)

PROJECT ENGINEER - The Whiting-Turner Contracting Co   Summer 2020

- Work with the project team to assist in preparing structural design and drawings for buildings (commercial, institutional, residential) from conceptual and preliminary stages of design through to completion
- Perform field review for projects under construction
- Administered workplace health and safety regulations, rules, and guidelines

FIELD ENGINEER – Geo-Technology Associates   Summer 2021

- Performed proctor tests, concrete breaks, nuclear gage tests with soil and asphalt, and wrote daily field reports (DFRs)
- Traveled to dozens of construction sites around NJ to gain a vast understanding of various geotechnical situations

SOLID MECHANICS II TUTOR/GRADER – Bucknell University   Fall 2021

CERTIFICATIONS

Google Data Analytics Certification

Engineer in Training Certification (EIT)

Maintenance of Traffic Certification (MOT)
